Mr. GEORGE PIEECY, Hendmaster, read the following report for the year 1887 :-Your Excellency, my Lord Bishop, ladies an centlemen.—In reviewing the past year we must commence by returning thanks to Almighty God that, whilst there was much sickness both in the neighbourhood and in the school, we were al spared to see its close. We began the year with 41 boarders and 15 day scholars, total 56, and closed it with 45-boarders and 31 day scholars total 76. The school was taught on 250 days (exclusive of Sundays). The total number of scholars on the roll was 100 (9 girls, 91 boys) and the average attendance rose from 52 in 1886 to 63.34 in 1887. The fees collected were \$5.836.58, being an increase of nearly 4 per cent For the first time one of our boys entered for the Cambridge University Local Examination, but the results will not be known in Hongkong for some weeks. In December H.M.'s Inspector. of Schools examined 46 children, who had made up the required 200 days attendance. 45 children (or 97.82 per cont.) passed. The only boy that ladies. failed had studied English less than a year, and came to grief in the intricacies of English spelling. There is no nobler cause in the world than that of situration, the training of our young boys and girls to play their parts in the battle of life, which is now a very much harder task than in days gone by: Everything new is regulated by competition and by the survival of the fittest. It therefore behoves both the Government and the public-to help by every means in their power those who promote the education of our vonue people. We have been appealing for some years for the purpose of addmentioned in the report, and that is the need of a large hall which might be a school-room in term time and also serve for gatherings of this sort. The multiplicity of these needs interferes with our being able to have them supplied, but still I don't see that there is any harm in mentioning them from time to time in the hope that some of our friends may be able to see their way to belp us to supply our wants. The school is partly supported by the fees, which this year are very large, and partly by the Government grant, which is also higher this year. I think, than it has ever been before, and partly by subscriptions. We are obliged to appeal in this way because some of the children are taken in and educated froe. Wherever possible the boys pay fees, but if orphaus or those without meaus are thrown upon us we feel it incumbent upon us to receive them, and it is on this account that the school is not self-supporting, and that we are obliged to ask our friends to enable us to obtain a suitable building as soon as possible. I hope that time will not be long delayed. Mr. Chater was kind enough to buy that piece of land mentioned in the report for us, on which we may hope to raise a school-room, so that we have the

The CHAIRMAN said-Gentlemen, as the report and statement of accounts have been in ing to the school. There is one thing specially your hands for some time, we may perhaps take thom as read. The result of the past year's working, although still very unfavourable, is much better than that of the previous year, and hope that the many "difficulties that have hitherto impeded the progress of the Company may now be regarded as things of the past. According to the advices received from our agents in Manila, the conditions of the sugar trade in the Philippines have experienced a change from which the Company can scarcely fail to derive much benefit. Up till quite lately it was the custom of the export houses in Manila to make heavy advances to dealars against contreets for raw sugar, and planters would make deliveries and grant lengthened credit for payment of the price, the natural result of this being that prices were maintained at such a lovel as to leave little, if any, margin of profit on the process of refining. The recent financial troubles in the Philippines have, however, put a stop to this, and dealers can now obtain advances only on cargo in golown, while planters will make no deliveries until they receive payment. Consequently it is to be hoped that the Company will be able to secure its supplies of raw sugar at prices more in accordance with those ruling land if only we had the means for building. I in other markets. An important alteration, too, shall now conclude by again expressing our has been made in the arrangement of the furmoon at the Refinery, by which we are enabled here this morning and for the kind words you to use Japan coal instead of Australian, and our manager is of opinion that this will effect a saving of about \$1,000 per month. The new cube machine referred to in the report should now be yory near Manila. Everything has been prepared for erecting and beginning to work it, and if half the anticipations of the management in Manila be realized, the Company has yet a very fair prospect before it, and I can only express a sincere hope that this may prove to be

the case. The sad death of Mr. Mortimer Murruy and the departure of Mr. F. D. Sassoon from the Colony has left us with Mr. D. Gillios as the only remaining member of the Consulting Committee. As stated in the report, we shall be glad if you will fill up the vacancies, but if you are unprepared to do so and will leave the matter in our hands, we will make the best arrangements we can. I do not know that there is any other point requiring comment, but if any questions are addressed to me. I will endeavour to answer
